Address: Lince, Lima, Peru

Front-End Software Engineer with 6+ years of experience designing and developing Single-Page Applications (SPA), Server-Side Rendering (SSR) solutions, and microfrontend architectures using React.js, Next.js, and TypeScript. Strong advocate of SOLID principles and Clean Code practices, ensuring maintainable and scalable solutions. Experienced in Docker-based environments, CI/CD pipelines, and cloud deployments with Vercel and Netlify. Proficient in TanStack Query, API integration, and cross-team collaboration. Familiar with Node.js for backend services and adept at using Figma for UI/UX design workflows.

PROFESSIONAL EXPERIENCE

Rimac Seguros **Lima, Perú**
Front-End Developer *March 2024 – Present*

- Led the redesign of a health insurance case management platform (React.js, TypeScript, Tailwind CSS, SPA), improving accessibility and responsiveness, resulting in a 20% productivity boost.
- Applied SOLID principles and Clean Code practices in refactoring legacy UI code, improving maintainability and scalability.
- Built reusable, modular React components integrated with TanStack Query for efficient data fetching.
- Implemented microfrontend-ready architecture to support future scalability.
- Deployed solutions using Vercel and containerized environments with Docker.
- Collaborated with stakeholders to align technical priorities with business needs.

Cibertec **Lima, Perú**
Front-End React Instructor *March 2023 – March 2024*

- Directed a 3-member team to redesign the React course rubric, increasing student engagement by 30% and boosting enrollment in advanced programming courses.
- Introduced Clean Code principles, SOLID, and Docker basics into the curriculum.
- Managed Agile sprints for student projects, ensuring timely delivery and bug resolution.
- Mentored junior developers on React.js, SSR with Next.js, Zustand, TanStack Query, and microfrontend concepts.
- Integrated Figma-based UI designs into project workflows.

Rivercon.com **Lima, Perú**
Front-End Developer *March 2017 – November2021*

- Built responsive web applications (React.js, Yarn, SPA architecture), improving workflow efficiency for industrial clients by 10%.
- Integrated REST APIs and ensured full cross-browser compatibility.
- Collaborated in Agile teams and participated in deployments via Netlify.

EDUCATION

CIBERTEC — **Lima, Perú**
Technical Professional in Computing and Information Technology — (2014–2019)

UNIVERSITY ANHEMBI MORUMBI — **São Paulo, Brazil**
Bachelor's Degree in Computer Science (SCHOLARSHIP RECIPIENT) — (2016)

CORE TECHNICAL SKILLS

- **Languages**: JavaScript (ES6+), TypeScript, HTML5, CSS3, Sass, Node.js (basic)
- **Frameworks & Libraries:** React.js, Next.js, Redux, Zustand, TanStack Query, Tailwind CSS
- **Architectures:** SPA, SSR, Microfrontends
- **Principles & Practices:** SOLID, Clean Code
- **Cloud & Deployment:** Vercel, Netlify, AWS, Firebase, Docker
- **Testing:** Jest
- **Code Quality & CI/CD:** ESLint, Prettier, Husky, Lint-Staged, SonarQube, GitHub Actions
- **Project & Collaboration Tools:** Jira, Miro, Trello, Figma
- **API & Data:** REST APIs, Postman, GraphQL (familiar)
- **Other:** Agile/Scrum, Storybook, Responsive Design
